

## 100 Random Podcast Titles

I asked ChatGPT to generate 100 random titles from podcasts in the [Top 10 most popular shows in US for 2023](#) (Crime Junkie, The Daily, Dateline NBC, SmartLess, This American Life, Morbid, Up First, Huberman Lab, Hidden Brain, Stuff You Should Know).

We can then use a number generator to select 10 of them to use in the project before pulling in the transcripts.
